## SUMMARY OF EXPERIENCE

Mr. Clark participated in the review and identification of all potential risks/hazards for all work groups at SaskPower. He assisted in the development and implementation of Corporate Safety Policies and Standards. Bob participated in the review and development of SaskPower's Safety Rulebook. He also represented SaskPower on a committee with the Department of Labour's Occupational Health and Safety Division review of Part XXX (Additional Protection for Electrical Workers) OH&S Regulations. He participated in the development of the SaskPower High Voltage Display designed for public education purposes and has been involved in public safety campaigns for the past twenty (20) years. He has received letters of commendation from the President of SaskPower for his efforts in public safety education.

Mr. Clark led the development of SaskPower's Environmental Management System for Transmission and Distribution. He participated as a subject matter expert in the development of SaskPower's Safety Management System. He has assessed both ISO 14001 and OHSAS 18001 management systems as an auditor.

Bob has twenty (20) years experience as a safety professional and has extensive experience working in industrial, commercial, and administrative environments. He has a good understanding of the need for practical and reasonable solutions to environmental, health and safety issues found in industry.
